

Case Study

RADHA KUND LAKE & SHYAM KUND LAKE India

North of Goverdhan is a village around these two small lakes. It is said Lord Krishna himself bathed here in self-purification and dug Shyam Kund Lake. Lord Krishna declared that whoever bathed in Shyam Kund would be shown the same amount of affection by Lord Krishna as was showered on her. So, these are considered to be very sacred.

PLOCHER Technology were invited to regenerate the holy lakes by Swami Bhaktivedanta Narayan. Treatment began in 2002.

The water in the lake was very polluted and had an extreme odour and algal problem.

Treatment

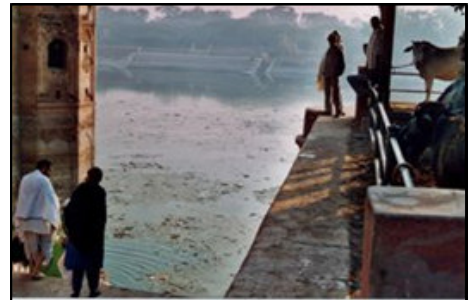

Plocher Bio-cats were installed and regular applications of PLOCHER products complete the treatment.

Result

Early February 2003 - foam appears on the water surface. This has never been seen before.

27 February 2003 - the water changes colour and there is a visible improvement in quality

24 June 2003 - the water is clearer and the algae has nearly disappeared. The water can be used again for holy rituals and as drinking water.

All Glories to Sri Sri Guru & Gauranga

To Roland Plocher Energy systems

Dear Mr. Plocher,

On behalf of our organization and other leaders in Braja Mandala, such as Rajendra Bhusan Gosvami and Prema rasa prabhu of Radhakunda, Dr. Sanjaya and Sri Giridhari Panda of Manasi Ganga, we would like to express our most heartfelt gratitude for the generous contribution you have made in purifying the most important holy lakes in this area, such as Sri Radha-kunda, Syama-kunda and Manasi-Ganga.

It has been of great concern for all of us and for millions of pilgrims who frequent these places, coming from all parts of the world, that such an improvement could be made. As of yet we have not come across such an effective and completely natural regeneration system as the Plocher system in our attempts for water purification.

Since 2002, when your method was first applied, we have seen a steady improvement in the quality of the water, without any negative side effects which may otherwise have come about by ordinary conventional methods. This inspires us to applaud your endeavours and wish you all success in your world wide activities.

Yours sincerely,

Swami B.V. Narayan
