DANISH GYMKHANA CHAMPION

Lone Kromann
Springturniermeisterin
Denmark

Lone Kromann, five-time Danish Gymkhana champion, has been using Plocher Horse Manure Composter in the horseboxes for the last four years. She applies it once or twice a week on the floor of the boxes thereby eliminating the strong smell of ammonia which has a detrimental effect on the respiratory systems of the horses.

During the “fly season” Plocher Horse Manure Composter prevents flies breeding in the boxes. Only the swallows don’t like this very much.

During the long drives with her horses to tournaments in neighbouring countries, Plocher Horse Manure Composter is used within the horsebox. Result – the horses do not have to inhale the ammonia smells and arrive fresh and fit for the tournament. Lone Kromann’s horses have also been receiving Plocher Weekly Boost and Daily Care over their feed for quite a while and it seems to stabilise their digestion, increase their vitality and their coats shine much more.

Mrs Lone Kromann has used the Plocher Special Cream on Mauke, one of her horses, after an injury. With daily applications, the injury healed completely within one week.

The Plocher Water Kat is being used for better water quality. Also the taste of the water has improved notably confirms Mrs Kromann. Now the Plocher Soil Activator will be used in her grazing pasture since she is very satisfied with the PLOCHER products.
