

PLOCHER PROGRAMME FOR POULTRY

Optimise productivity, reduce chemical inputs ... and save money, increasing profit margins

PLOCHER products are unique, relying on nature and natural life cycles to provide the solution for an ecological, profitable future for agriculture. They are not bacteria, enzymes or bugs, and are suitable for use in conventional and organic systems.

PLOCHER WATERKAT

Water quality is crucial for optimal livestock care. Plocher WaterKat is a catalyst which re-vitalises water and helps to improve quality, taste and dissolved oxygen levels of water, so consumption rises. It helps to:

- Improve citric acid cycle which provides more energy
- Reduce aggressive limescale and improve hygiene
- Reduce level of toxins, heavy metals, pollutants and pathogens

PLOCHER LIVESTOCK CARE / POULTRY PREP

Plocher Livestock Care is used by egg producers

Poultry Poultry Prep is suitable for use for meat producers

These products have oxidative properties which can aid:

- Condition, revitalise and reduce stress within birds
- Improve feed usage and metabolism
- Improve meat quality
- Improve egg quality and strengthens shells
- Lower ammonia production in manure
- Reduce incidence of pad and hock marks
- Aid decomposition of manure

PLOCHER KOMPOSTER FOR POULTRY

- Improves housing climate and hygiene
- Significantly reduces odours, pathogens and fly infestations
- Fixes nitrogen and other nutrients into manure, producing top quality fertiliser

On field areas:

- Improves the overall hygiene due to fewer pathogens
- Reduces recovery time after stressful conditions
- Improves soil structure by stimulating aerobic (oxygen-loving) microbial activity
- Increases soil fertility by fixing nitrogen and other nutrients improving availability
- Raises water retention capacity and filtration

APPLICATION

PLOCHER WATER KAT

Plocher Water Kat treats up to 400 gallons/1500 litres of water per day without the use of chemicals, or the use of any electrical or magnetic source of energy.

Installation

1. Site the Plocher Water Kat between the water supply pipe and the main shutoff valve.

NOTES: The Plocher Water Kat MUST be at least 1m away from electrical motors and fuse boxes, and record an electro-magnetic field of less than 200nT.
Ensure the Plocher Water Kat will not get wet or touch the ground.

2. Having selected the fixing point on the pipe, fix the Plocher Water Kat on the pipe using the clamps, ensuring that the Plocher Water Kat is in direct contact with the water pipe.

3. Thoroughly rinse any screen filters in the water system and check the screens weekly until clear of deposits.

PLOCHER LIVESTOCK CARE

Plocher Livestock Care can be added to feed or drinking water.
Mix with water at a rate of 30g/1000 litres of drinking water, or with feed at 60g/ton.

PLOCHER POULTRY PREP

Plocher Poultry Prep can be added to feed or drinking water.
Mix with water at a rate of 30g/1000 litres of drinking water, or with feed at 60g/ton.

PLOCHER KOMPOSTER FOR POULTRY

Plocher Poultry Komposter can be used in housing and on manure heaps.

IN THE BARN

FIRST APPLICATION: Mix 3g/m² in water and use a sprayer to spread throughout the housing including floor, walls and ceiling.

FUTURE APPLICATIONS: Mix 2g/m² in water, dry sand or sawdust and spread over the bedding.

ON HEAPS

Mix 40ml/m³ with water, dry sand or sawdust, leave to stand and apply evenly through the heap.

FREE RANGE

Mix with water and spray at a rate of 20g/100m³
Repeat monthly.

ADDITIONAL INFORMATION:

PLOCHER Programmes are not a substitute for veterinary treatment. Homeopathic treatments are preferable to the use of traditional medications - they will not interfere with the PLOCHER Programme. Continue application of the Programme during medical treatment.

Use of antibiotics, medication and detergents may delay the effect of the PLOCHER Programme.

STORAGE:

Products should be stored in a cool, dry place, at least 1m from any fuse boxes or large electrical equipment. Store on wood or plastic, not metal or directly on the ground.

For the best results, the full range of products should be used together. These products are designed to have long-lasting beneficial effects and although they start working immediately, visible results may not be instantly apparent.
